# **Perfect Keyboard With Some Hiccups**

Reviewed in India on 2 December 2018

No doubt, Its a 5 star product but it comes with its own set of minor issues which may affect certain set of users only

Rest its a wonderful product from Logitech. You get full functional keybaord in small comfortable to carry package with every required key on board. Typing is a breeze on this keybaord with soft responsive keys.

## UNBOXING

- 1. Keyboard
- 2. USB unifying receiver
- 3. 2 AAA batteries pre installed (pull off white pullout from batteries, to power up keyboard)

All stars

All text, ima...

4. Two extra battery covers to choose your flavor (in all pink, blue, white)

## PROS:

- 1. Full qwerty keyboard with numpad
- 2. Keys are soft & responsive with proper feedback
- 3. Full row of function keys with alternate shortcuts
- 4. Light weight & overall small profile for easy carry on
- 5. Comes with unifying receiver (look below for details)

Need customer service? Click here

- 6. Nice looks, though not premium
- 7. Good quality wrt soul porpose of keyboard ie typing
- 8. Battery test: Working properly since 15th oct. Rest for how long it lasts, time will tell. Logitech claims 2 yr life, but i will update my review whenever battery replacement is required. Just for an idea, my mouse lasts for upto a year with single duracell, so we can expect good life from keyboard also.
- 9. Upper arrow key is slightly projected, for easy identification in cramped layout of arrow keys. But you need to get used to it.
- 10. Plug n play. Easy setup. Just connect & use.
- 11. Works good with smartphone & smart tv also. Infact no setup required in case of android device, be it tv or mobile. Just plug in receiver & both keyboard & mouse will work without any issues.
- 12. Price bracket. If you get to grab it on lightening deal, then its cherry on cake.

#### CONS:

- 1. Slightly thick profile especially in front zone, that too without a wrist rest, so may feel uncomfortable in long typing sessions.
- 2. No caps, num, indicator, so you need to rely on software based on screen caps indicator. (in my case, my laptops own keyboard has caps led, so it indicates caps status)
- 3. Would have preferred full size arrow keys. They could have reduced size of shifft key instead to accomodate. To cover all keys in small package, they have highly customized the layout. It will take time to get adjusted to it
- 4. Slight flex in lower middle zone near space key due to improper height of mid zone rest pads. Theres 1-2 mm gap below them when keyboard rests on flat surface. So it can be fixed.
- 5. Some basic fn shortcuts missing as per laptop perspective.
- -Theres this software named Setpoint by logitech available from product download page which you can use to customise FN + Function keys shortcuts. But you wont find setting to add brightness +/-, wifi toggle, touchpad toggle, projector etc. Its havving general shortcuts like my comp, copy paste, play pause, control panel, page up down etc.

#### UNIFYING RECEIVER:

It allows upto 6 compatible devices to connect to computer with just one receiver. Look for unifying symbol on device (orange square patch with clear asterisk mark) (pic attached)

For easy setup,

- 1. Install unifying software from logitech
- 2. Start it and click on advanced
- 3. Click on pair & follow on screen instructions
- 4. All connected devices will be listed

(Alternatively you can also follow direct steps on screen & click on next)

Tested on Logitech B175 mouse & working properly. Both keyboard & mouse seamlessly connect to unifying receiver. B175 comes with normal reciever, but mouse is compatible with unifying technology.

## GENUINITY:

Some users have commented on receiving fake or first copy product. I have received genuine product, successfully registered on Logitec site without any issue.

Advice: Be carefull while choosing seller, to avvoid issues like this, check their ratings, amazon fulfilled tag etc. So far i had an awesome experience with Appario Retail.

# FINAL VERDICT:

Its a perfect low cost, compact & effective device. You wont regret getting it. Its pros outweigh its cons. Havent faced any serious issue so far. Its all good & perfect company for may Dell XPS L502x.

## **Compact and Light Weight**

Reviewed in India on 19 April 2018

#### **Verified Purchase**

Its a nice keyboard and works great.

#### PROS:

- 1 light weight and compact
- 2 unifying supported
- 3 long lasting with batteries(24 months)

#### CONS

- 1 has a bit flex when typing in center of the keyboard
- 2 the stickers on keys are very reflective and not visible properly some time.
- 3 has no indication leds for caps, num and locks
- 4 up and down arrows are small

Overall a nice keyboard and would suggest if u can compromise few features for compactness and wireless.

# fake product

Reviewed in India on 16 October 2017

#### **Verified Purchase**

Do not buy this product. its fake.

I got a duplicate item ,failed to register on logitech site.

Logo on the product differ from the original logitech logo even though the product in the picture given here has original logo .

## Compact keyboard but few limitations.. read on the review

Reviewed in India on 8 June 2020

## Verified Purchase

Here is my review in 7 points

- 1-Keyboard is compact. But not for gamers
- 2-Good portability and lightweight
- 3-Key press is normal. Neither soft not hard (see the video review)
- 4-Since it is compact, one will need to get used to the keys. If you have big fingers, then this one is surely not for you
- 5-The scroll keys are very small and as again, little hard to find. You somehow slip the tap and finger goes to adjacent key
- $\hbox{6--Unifying receiver works very smoothly with Logitech mouse}\\$
- 7-Now comes the last and important point. There is flaw with the battery cover. It is not at all sturdy and pops out with a small pressure. Meaning that the locking is not that good. Even if you are carrying it for example, in the bag, it is surely going to fall off

Thanks for reading the review. Hope you find it useful

## Great Kevboard

Reviewed in India on 15 August 2018

## **Verified Purchase**

Excellent keyboard specially for Laptop users.

# Pros:

- Compact & Stylish design, looks nice.
- Lightweight but sturdy build. Almost silent keys.
- Matches 15" Laptop keyboard layout, joy for Laptop users.
- Unifying Receiver, 2 AAA Batteries, 2 extra Battery Compartment Panels provided.
- Simple Plug-&-Play setup, fast link-up with receiver, single receiver caters to upto 6 Unifying supported devices.
- On-Off Switch and prop-up legs at the bottom, slot on the side to carry Unifying Receiver.
- 2 Years battery life as claimed by Logitech with Auto-Sleep function. Only time will tell the actual findings with about 8 hours per day usage.

## Cons

- Standard Desktop Keyboard users might take little time to getting used to this one because of its compact size.
- As a Laptop Keyboard, back-lit keys would have been a great help while working late nights.
- Caps Lock key could have been smaller and Enter key could have been bigger.

Overall a great purchase. Value for money.

# Simply wonderful ...

Reviewed in India on 27 January 2018

Verified Purchase

I have been using this for few months now it works really smooth and fast, despite being wireless you don't feel any lag in sending inputs to machine or neither in connecting, you just slide the on/off switch and it works in milliseconds... no hassle ..

And batteries are like you just forget there are any.. never had to change them(yet).

Key's are pretty well but a little small in case you have big fingers, also those multi colour side panels looks wonderful.. just buy it..!!!

#### Pros: Before i purchased it, i used K220 ...

Reviewed in India on 29 April 2016

#### Verified Purchase

Pros: Before i purchased it, i used K220. This K230 is just an upgrade of the previous one. Very compact in size. We can use both Desktop and Laptop. We can hold it in our laptop bag during travelling. Those who are having the ability of speed typing, should purchase this product. Another one an important pros is they have made the SHIFT key as its original size. some immature keyboard manufacturer built the shift key as small size along with the nearest button of [ | \ ]. During speed typing, our finger may typed [ | \ ]button instead of shift key. But this key board built in correctly. CONS: 1) There is no led light in Capslock key. 2) We need to hold FN button + printscreen, during capturing any screenshot instead of single print screen button.

#### Good Keyboard initially, but not durable

Reviewed in India on 14 November 2017

#### Verified Purchase

Initially the keyboard was good, now the keys are not functioning properly. I have to press really hard to make the keys work. It's not just one or two alphabets but most of the alphabets are having the same issue. This is not a durable product. I am forced to change my initial review.
